(54) PORTABLE TELEPHONE TERMINAL EQUIPMENT

(57)Abstract:

PROBLEM TO BE SOLVED: To improve convenience and to reduce a cost by providing a remote control operating function controlling each vehicle equipment of a vehicle by small power radio for a portable telephone terminal equipment executing telephone communication.

SOLUTION: CPU 50 judges whether a vehicle data request part 50a outputs a vehicle data request signal. When it outputs, a transmission and reception part 43 transmits the vehicle data request signal to the vehicle from an antenna 44 by small power radio. Next, CPU 50 judges whether a vehicle equipment control part 50b outputs a vehicle equipment control signal corresponding to a vehicle equipment desired to control. When it outputs, the transmission and reception part 43 transmits the vehicle equipment control signal to the vehicle from the antenna 44 by small power radio. Next, CPU 50 judges whether data is inputted from a touch key 46. Then CPU 50 stores baggage data, etc., inputted from the touch key 46 in a memory 47. The transmission and reception part 43 transmits data stored in the memory 47 by telephone communication.
